

OZONE THERAPY

beyond oxygen

O₃

TREAT THESE CONDITIONS WITH NO ANTIBIOTICS:

SKIN INFECTIONS *Hot Spots* **Pyodermas** RASHES *Gangrenous lesions*

Deep abrasions w/ road dirt contamination **Lyme disease** Kidney Failure

Liver Failure **PANCREATITIS** *Viral and bacterial diarrhea* Cancer adjunct therapy

Yeast filled ears **ACUTE AND CHRONIC OTITIS** Autoimmune conditions

OZONE THERAPY

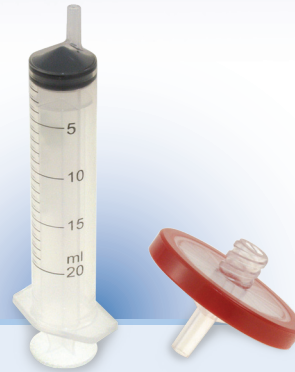

parts & accessories

TOPICAL SOLUTION

Glass flask 250ml and fittings for fluid ozonation
AFLOL250

Glass flask 500ml and fittings for fluid ozonation
AFLOL500

SUBCUTANEOUS THERAPY

20ml syringe (Box of 120ea)
CJDCU020

Filter Luer taper (Box of 50 ea)
CFIJE001

RECTAL OR VAGINAL INSUFFLATION

Insufflation cannula 18cm (Box of 100 ea)
CSOFE018

Insufflation cannula 40cm (Box of 100 ea)
CSOFE040

100ml syringe (Box of 50 ea)
CJDCU100

HEMOTHERAPY

Major autohemotherapy KIT (Box of 20 ea)

CKAHT001

“Y” tubing set (Box of 50 ea)

CEAHT001

Filter Luer taper (Box of 50 ea)

CFIJE001

Vacuum flask 100ml for hemotherapy (20 ea)

CBOV0100

Vacuum flask 250ml for hemotherapy (20 ea)

CBOV0250

Vacuum flask 500ml for hemotherapy (20 ea)

CBOV0500

Vacuum flask 1000ml for hemotherapy (10 ea)

CBOV1000

Natrium citrate (NaCi) anticoagulant (use 9:1)

CNACI010

Extension tubing A-150 Luer-lock F – M (Box of 100 ea)

CALMH150

Extension tubing A-150 Luer-lock M – M (Box of 100 ea)

CALMM150

DERMOTHERAPY

Bag #1 (22cm X 45cm) for dermotherapy (50 ea, Sterile)

CBOLS001

Bag #2 (22cm X 65cm) for dermotherapy (50 ea, Sterile)

CBOLS002

Bag #3 (35cm X 50cm) for dermotherapy (50 ea, Sterile)

CBOLS003

Bag #4 (35cm X 85cm) for dermotherapy (50 ea, Sterile)

CBOLS004

Bag full body (85cm X 185cm) (40 ea, Non Sterile)

CBOLS008

STERILIZATION OF ANESTHESIA MACHINE

Anesthesia Head cover bag 25 X 55 and fittings (40 ea)

C COCA002 - Anesthesia Machine USE ONLY

Anesthesia Head cover bag 35 X 70 and fittings (40 ea)

C COCA001 - Anesthesia Machine USE ONLY

OZONOBARIC P

OZONOBARIC P is a full portable medical ozone generator, based on a rugged hermetic suitcase able to carry an oxygen cylinder. OZONOBARIC P has been designed according to the highest safety and quality standards of the electromedical industry, bringing a cutting-edge technology such as dual measurement concentration system, dual ozone catalyser system, high frequency generator coaxial cooled design. User-friendly operating by switch less capacitive touch pad; just an enter, cancel and sliding allows full intuitive operation and setting values.

OZONE ACCESSORIES

Rolling cart with 2 Drawers
AMROX001

Catalytic ozone waste system
ACATA008

O2 Regulator
AAPBP002

O2 connecting tube (PTFE) 4mm ID X 6mm OD
ATUES001

IV / Vacuum Flask Hanger for rolling cart
AMRPS001

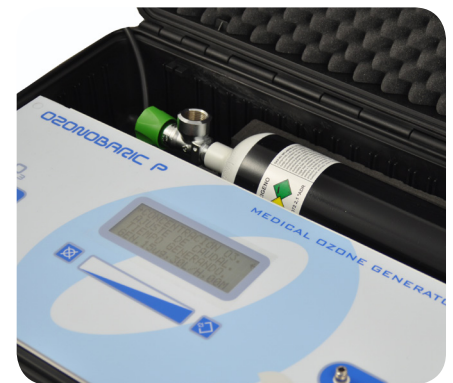

OZONOBARIC P IS SIMPLE, PORTABLE & HIGHLY EFFECTIVE FOR YOUR PATIENTS!

USER-FRIENDLY

PORTABLE

COMPACT ALL-IN-ONE

OZONOBARIC P is suitable for any kind of ozone therapy application: Major Autohaemotherapy (MAHT), minor Autohaemotherapy (maHT), intra-articular and intra-muscular infiltrations, rectal and vaginal insufflations, topical bagging in open or closed circuit, oil ozonation, water and normal saline ozonation.

Veterinary Use of Intravenous Ozone and other Ozone Applications

Excerpts from the Citizen's Council for Truth in Medicine, Washington, DC

Viral Diseases

Ozone is very effective in acute and chronic viral diseases as a virus inactivation agent in reversing positive antibody tests and improving the general health of the animals.

Equine Influenza and other VRCDs of horses and other animals including cattle, cats, dogs, sheep, goats, domestic birds and various zoo animals.

Ozone is also effective against viral respiratory infections with secondary bacterial infection

Bacterial Diseases

Ozone is especially effective when treating super infected, slow healing wounds, including those that do not respond well to antibiotics such as MRSA and endotoxemia.

Fungal Diseases

Ozone is effective against Actinomycosis and Candidiasis, Chromomycosis, North American Blastomycosis, Histoplasmosis, Aspergillosis. Its application can be done via systemic route or topical route depending on the disease. Is a valuable adjunct in Chronic Obstructive Pulmonary Disease (COPD, heaves) of horses.

Leukemias, Lymphomas and other Malignancies

Ozone is particularly effective against any blood and malignant disease caused by viruses and bacteria such as Bovine Leukosis, Canine Malignant Lymphomas, Feline Lymphosarcoma, Feline Leukemia and lymphoproliferative disorders in turkeys, chickens and zoo animals.

Rectal Applications of Ozone

Rectal ozone insufflations are a powerful adjunct to the treatment of both infectious and non-infectious diseases of the digestive tract. Ozone is effective in reducing intestinal parasites (helminths), viruses and bacteria, protozoa and fungi. Ozone is effective in diarrhea and inflammatory bowel disease of horses.

Vaginal Applications of Ozone

Vaginal ozone insufflations are easy, cost effective and successful treatment against repetitive vaginal Candidiasis or as an anti-fungal in drug resistant cases.

Topical Applications of Ozone

Topical ozone (Ozonated oils) is effective for dermatomycosis, osteomyelitis and infected wounds. Topical ozonated oil applications have widely demonstrated powerful germicide properties as well as promoting granulation and boosting healing. Just a few drops of ozonated oil can treat conditions such as canine otitis, dermatomycosis, burns, hot spots.

Ozonated Water

Ozonated water has obvious multiple beneficial applications in veterinary medicine and surgery. *Fluid therapy has a widespread applications such as ozonated water and ozonated normal saline for lavages (mouth infections, open wounds, after surgery) and for SQ injections.*
